Method of Shipping

In the many years we have been in the nursery business and the thousands of shipments we have forwarded to our customers in all parts of the country we find that the method of shipping is as essential as the growing of the plant itself. Unless otherwise instructed, practically all plants we ship are forwarded by Railway Express. This is the speediest and most reliable service that we know of today. At the same time the cost of this transportation is very economical.

We have frequent pick-ups daily right from our packing house and various trains are met with our shipments. We have found that plants for destinations within a radius of 400 miles are ordinarily delivered the next day, those traveling to distances of 500 to 1000 miles, the second or third day. This wonderful service coupled with a good job of packing assures you of receiving your plants promptly and in the best of condition.

Daisy Double White Swan

A Wonderful New Double Variety

This is without question the best Double Daisy that we have ever grown. The flowers are uniform and of good size, comparing with the Double Pyrethrums. Good two year old established clumps will produce from 15 to 30 pure white flowers per plant on strong wiry stems 24 to 30 inches in length. They flower for Memorial Day and continue throughout the month of June.

The photograph displayed above shows that the flowers can be used to advantage. While we made this vase entirely with these New Daisies and Asparagus Plumosus, they also work in well with almost any combination of flowers and wonderful effects can be created.

We were recently informed by one of our customers who purchased a large quantity late last fall that he was very successful in forcing this Daisy in his greenhouses throughout the winter. The flowers were even more beautiful under glass than what we claim for them outdoors. Considering their value for outdoor flowers, also their indoor forcing, we have here one of the best plant introductions of recent years. Please note our attractive price.

Two year field grown clumps for delivery throughout the entire fall. Early planting is recommended.
Per 10, \$2.00; Per 100, \$15.00

Forcing clumps, ready for shipment in the month of December, properly cured and ready for benching immediately when received.

Worthy Novelties

We wish to call your attention to the few plants that we are listing below. These are plants that the trade is continuously looking for. During the last two or three years we have displayed special effort and have propagated good quantities. The reason for listing these by themselves is so that you will recognize them at a glance. Should you wish to make a purchase of any of these scarce items, we are now in position to take care of your requirements at reasonable prices.

DIANTHUS LOVELINESS

One of Allwood's outstanding introductions, flowers a shade of heavenly mauve, with petals deeply cut and lacinated, and of delightful fragrance. It is distinct from all other types of Dianthus, at first appearing like a large clump of a grassy plant form. From these clumps are produced on the average of 12 to 20 flowers on stems 10 to 12 inches in length. The flowers are so much different that they command a great deal of attention. They are very distinctive in any type of floral arrangement and also make very attractive plants in the garden.

Per 10, \$2.00; Per 100, \$15.00

DIANTHUS ROSE CUSHION

This outstanding new variety is quite different from other Dianthus. The clear bright rose colored flowers are quite erect, they do not droop. The plant does not run wild, keeps its shape, very low growing and compact, ideal for low borders or rockeries. It is perfectly hardy and does well in any well drained soil. Considering the style of its growth it is very attractive even when not in flower.

Per 10, \$2.00; Per 100, \$15.00

NEW ORIENTAL POPPIES

FARQUHAR. This plant has the nature of the well known Buddleias, growing about 24 inches in height, producing large spikes of bright pink flowers. The entire bush is sweetly scented. In addition to being a very conspicuous plant in the landscape, the flowers are also outstanding for cutting. The plant deserves much more attention than ordinary plant material. We highly recommend this for florist's cut flower purposes or for landscape plantings.

It develops into large clumps producing 8 to 12 heavy spikes of dark salmon-carmine flowers about 12 to 14 inches in height. Our planting attracted a great deal of attention when they were in flower this spring. A trial will certainly convince you that there is something new and attractive in Astilbes. WHEN FLOWERS ARE SCARCE • • • Here Is the Answer

Here is a basket any florist can produce with a small investment. Please note we have used about 16 nice spikes of *Liatris Pycnostachya*, 18 nice stalks of *Hemerocallis Kwanso* Fl. Pl. and a small bunch of *Artemesia Silver King* for filler.

These items are very easily grown, succeeding in almost any type of soil. Flowers were cut the second week in August from our nursery rows, just at the time of the year when flowers as a rule are very scarce.

100 plants each of the three items used in the basket will require an investment of about \$21.00. These 300 plants will furnish you for many years with a good supply of cut flowers for use in various floral arrangements.

Novelty Hardy Chrysanthemums

FIELD GROWN CLUMPS

This fall when our Hardy Chrysanthemums come into flower we expect to be in position to show one of the most outstanding fields in cultivation today. As you know, annually we try out practically all new introductions and maintain for cultivation only those which in our opinion are worthy of future propagation.

It has been our custom in the spring to offer from 2" pots practically all the Chrysanthemums that we grow. This year we have provided field grown clumps for our fall sales. You will find our prices very reasonable. If you are a fancier of Hardy Chrysanthemums and grow them for profit, we advise that you make a selection from our list. We are sure you will be pleased.

Belladonna Improved

Cliveden Beauty

Our strain of Belladonna Improved is produced from stock seed of Cliveden Beauty, carefully selected to keep it absolutely pure and true to type. It is far superior to much of the so-called Belladonna Improved that is on the market today. We can thoroughly recommend it to the florist or nurseryman who really is critical and wants the best to be had. It is the finest light blue for forcing or for outdoor growing.

ERICA OR CALLUNA**Heather—Nice Field Grown**

We have grown Ericas for four years and are continuing a large propagation. In the months of July and August practically all varieties are in full flower and they are really magnificent, so different than most plants. They are an evergreen, at the same time producing flowers the full length of the stems and are very ornamental.

We are convinced that there is nothing that can be used to the same advantage as the Ericas or Callunas for bordering a planting of Azaleas or Rhododendrons. They also make a nice showing in rock gardens, thriving in acid soil and for shady locations will do well in neutral soil. Taking into consideration their value for these types of plantings they are worth a great deal.

Fall planted perennials will settle in the soil before hard winter conditions set in. About the first part of December it is advisable to cover them slightly with a thin layer of straw or cornstalks, just enough to keep the sun from them. The plants will make quicker growth and give you a larger crop of flowers the first year.

**GYPSOPHILA
BRISTOL FAIRY**

This *Gypsophila* is now too well known for detailed description. We have for sale this fall a real nice planting of field grown roots which are of outstanding quality. For the best results it is advisable to plant these as early in the fall as possible. In December cover them slightly with corn stalks or straw, just enough to keep the winter sun away from them. This covering of course should be removed in early spring.

The plants we ship now will produce for you next spring a real worthy crop of flowers. If this crop is cut clean, the plants will continue to produce for you a scattering of flowers over your field, coming back with a real good crop in September.

Our price for strong two year roots is \$2.50 per 10, \$20.00 per 100, 25 at 100 rate.

Oriental Poppies

New and Unusual Varieties

Due to the efforts of the recently organized Poppy Societies, there has been a lot of interest displayed in behalf of the Oriental Poppies. It is our understanding that these people are doing a great deal of work toward the betterment of Poppies and it must be admitted that they deserve credit.

All plants offered are strong field grown, ideal for transplanting for future flowering or if purchased in early fall, the plants we ship will provide good propagating material.

PEONIES

It has been said that the Peonies are the poor man's Rhododendron. We believe that they are even more than that. When they are once planted and become established they last for many years. Their deep green foliage is always an ornament in any style of planting. In addition to the foliage, in season the Peonies produce flowers that everyone really admires. They are very easily cared for and it seems that with the years they continue getting better.

A few years ago a planting of Peonies represented a big investment. This we believe slowed up their sales. We never asked high prices for our Peonies, instead we propagated the varieties we paid big money for and produced them in quantities so that we could sell them to our customers at what we consider reasonable prices. There are many Peonies on the market now at ridiculously low prices. We believe that most of these are dug from neglected fields and are poor in vitality. Such a Peony is too expensive at any price. If a Peony once goes down in vitality it never regains. For the reason that we have cultivated our fields continuously, we now have one of the best assortments in existence and our plants are first class in every respect. Giving this all due consideration, you will find that our prices are very reasonable. Whether you buy small or large quantities you will find our Peonies a real good investment.
